# COUCH, CHOICE, CHAOS

An unconventional piece of fiction that blends cinematic storytelling with music sequences.

The film follows a couple sitting on their couch, whose lives are suddenly disrupted by the choices they make while watching a video.

As their reality collides with the unfolding images, the boundaries between their world and the music-filled cinematic universe blur, creating a poetic and immersive narrative experience.

**Random Forest**

# DIVE INTO INTRIGUE

**Random Forest** takes its name from a well-known algorithm widely used for recommendations and predictions. Algorithms from this family silently shape the choices we make every day, influencing not only what we watch, but also how we live.

At its core, this project is a reflection on the digital ecosystem that surrounds us & how our behaviors subtly shift, often rooted in the most mundane gestures of daily life. From something as simple as deciding which film to watch next, our actions are increasingly guided by invisible systems, nudging us along paths we barely perceive.

**Random Forest**

# KEY CHARACTERS

## **SARAH** THE SILENT BINGER

Independent, with a subtle arthouse, literary vibe. She loves quiet intensity and stories that linger.

Her guilty pleasure: sinking into her couch in full chill mode. And in a relationship, she's the one who always asks for one more episode.

**Random Forest**

# KEY CHARACTERS

## MEDDY THE RHYTHM KEEPER

Professional drummer widely respected within the scene. Behind his free-spirited, saltimbanque image lies a man who is deeply serious about love, grounded, emotionally steady, and trustworthy.

He met Sarah two months ago, and so far, their relationship feels like an obvious, natural fit.

# KEY CHARACTERS

## NOIR PIXEL

### THE POLYMORPHIC HACKER

Legend has it that Noir Pixel disappeared at the age of eight while gardening with his grandfather. He reemerged years later, altered: his mind fused with data, his music a bridge between worlds.

No one knows his intention. No one knows who he really is. No proof he exists, only traces: distorted frequencies & signals leaking through melodies.

# MEET THE TEAM

**NOIR PIXEL**  
DIRECTOR

Trained as a computer scientist, he holds a PhD in mathematics applied to the human sciences.

His academic research focused on the ethics of algorithms, conducted in collaboration with cognitive science laboratories across several universities, where he studied and measured the amplification of cognitive biases driven by recommendation systems.

Alongside, Noir Pixel is a musician and rapper who has collaborated on numerous artistic projects over the past two decades.

**LUDO BLOT**  
CINEMATOGRAPHER

Cinematographer with over 10 years of experience behind the camera. He has directed and filmed numerous music videos for a wide range of musicians, crafting visuals that perfectly complement the artistic vision of each project.

Beyond music, Ludo has worked extensively with brands, sporting events, and documentary productions, bringing his expertise and creative eye to every frame.

His work is distinguished by highly aesthetic and artistic shots, a style he has refined throughout his professional experience.

“

*The theme is universal, the style is free, the format unorthodox. This film was born of a necessity: to capture, in the most beautiful and uncompromising way, the interplay between our behaviors and the use of technology. In a world increasingly shaped by social networks, by generative tools and even ChatGPT being used to write stories, the cinema itself is challenged. We believe it is vital to preserve a space for human freedom and creativity.*
